Preliminary Notes

Working with GLES Data

The German Longitudinal Election Study (GLES) is the central infrastructure project in Germany for the continuous collection and provision of high-quality data for national and international election research. The methodologically diverse surveys of the GLES enable the research of political attitudes and behavior of voters and candidates. Since its inception, the GLES has been conducted in close cooperation between the German Society for Electoral Research (DGfW) and GESIS – Leibniz Institute for the Social Sciences. More information is available here: www.gles.eu.

In order to provide high quality datasets, we appreciate your help. If you discover an error whilst working with GLES data, we would highly appreciate if you would inform us via e-mail (gles@gesis.org). Please send us a description of the error, the study number (ZA-number), as well as the version number of the dataset you are using.

We recommend always using the latest version of GLES data. Information on data access can be found on the GLES website (www.gles-en.eu/download-data) or directly via <https://search.gesis.org/>. News about data releases can also be obtained from the [GLES website](#), the [GLES newsletter](#), or [Twitter](#).

Add Your Publication to the GLES Data Bibliography

To gain an overview of the use of the data, we kindly request users of GLES data to inform us about publications that utilize those data (bibliographic information, study no. of the dataset).

Publications that are completely or partially based on GLES data will be listed in the official bibliography of GLES. In case of limited access to the publication (e.g., conference papers), we would highly appreciate it if you sent us a PDF-file or a print copy of your publication.

1. Study Characteristics

1.1 Study Number

ZA7700

1.2 Title

GLES Cross-Section 2021, Pre-Election

1.3 Current Version

3.1.0, 2023-08-22, doi:10.4232/1.14168

1.4 Period of Data Collection

2021-08-26 – 2021-09-25

1.5 Mode of Data Collection

Cross-sectional survey in mixed-mode design: online interviews (CAWI) and paper-and-pencil interviews (PAPI), interview invitations by mail.

1.6 Units in the Dataset

The main dataset (ZA7700_v3-1-0) consists of all 5,119 partial and complete interviews.

In an additional paradata set (ZA7700_timevariables_v3-1-0), technically generated time variables are provided for CAWI mode respondents.

2. Study Conception

2.1 Background

The German Longitudinal Election Study (GLES) is the central scientific survey program in Germany for the continuous collection and provision of high-quality data for national and international election research. The methodologically diverse surveys of GLES make it possible to investigate the political attitudes and behaviors of (potential) voters and candidates. GLES has been carried out in close cooperation between the German Society for Electoral Studies (DGfW) and GESIS - Leibniz Institute for the Social Sciences. For more information, see www.gles.eu.

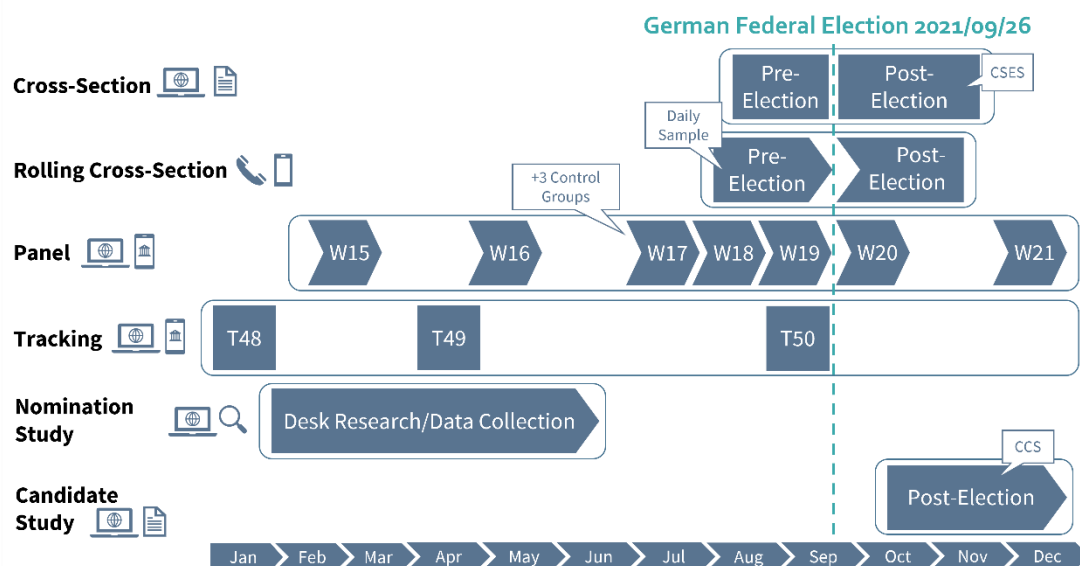

Figure 1: Design of the German Longitudinal Election Study (GLES), 2021

The GLES Cross-Section 2021 consists of the GLES Pre-Election and Post-Election Cross-Section, which is conducted in the four weeks before and eight weeks after the Bundestag election. For the first time, self-administered surveys were conducted online (CAWI) and in paper (PAPI) for the federal election in 2021. People are randomly selected and interviewed.

The GLES cross-section has a long tradition. Since 1994, comparable cross-sectional surveys have been available to election researchers, so that longitudinal studies using these data are easily possible. Furthermore, the cross-sectional data have been transferred to the so-called long-term panel since 1994. This also makes it possible to examine intra-individual changes. Since the cross-sections include a large number of questions, the background to voting decisions and participation in elections can be analysed in depth. Due to the large number of cases, it is also possible to conduct meaningful analyses of subgroups of the electorate. The oversampling of respondents from East Germany also allows for East-West analyses.

2.2 Structure of the Study

Although the questionnaires of the pre- and post-election cross-sections differ, the question program is closely coordinated, which is why the datasets can be provided in both individual and cumulative form. However, the question program also differs in parts. In addition to time constraints, this is due to the fact that the post-election cross-section is connectable to the Comparative Study of Electoral Systems (CSES) and corresponding question program adjustments are made. The present study description refers to the pre-election cross-section.

2.3 Content of the Study

The content of the study is the observation and analysis of the attitudes, opinions and behaviour of both voters and non-voters. The questionnaire of the pre-election study deals with the following topics:

- Voter turnout & decision
- Political interest
- Satisfaction with democracy
- Economic situation
- Psychological constructs
- Party ratings
- Populist attitudes
- Positions on political issues
- Specific attitudes towards Corona politics
- Corona infections in one's own environment as well as one's own affectedness
- Subjective detachment
- Questions on social justice
- Party and candidate contacts in the election campaign
- Leading candidates, candidates for chancellor & candidates from constituencies (names of candidates from CDU/CSU, SPD, FDP, DIE LINKE, Bündnis 90/Die Grünen and AfD included in questionnaire)
- Political knowledge
- Performance evaluation of government and opposition
- Unconventional participation - offline and online
- Media use incl. social media
- Conversations about politics in the run-up to the federal election
- Coalitions
- State elections in Berlin and Mecklenburg-Western Pomerania (CAWI)
- Socio-demographics incl. enquiry about professional activity
- Information on the area of residence

In addition to the information on content, further information is provided (e.g., geographical context information and time stamps per screen page for CAWI respondents).

3. Sampling

3.1 Geographic Coverage

Germany (DE)

3.2 Universe

The population for the GLES cross-sectional survey is persons with German citizenship aged 16 and older, registered in the Federal Republic of Germany at their place of primary residence.

3.3 Selection Method

Multi-stage register sample, oversampling of East Germany.

In the first stage, a sample of municipalities is drawn, among which the given 162 sample points (108 sample points in West Germany and 54 sample points in East Germany) are distributed.

In the second stage, the drawn municipalities are asked to provide a random sample of persons belonging to the population. Municipalities that account for more than one sample point must provide correspondingly more addresses. In the third stage of sampling, the sample of persons is drawn by the implementing institute from the addresses provided by the municipalities.

The sampling at the municipal level was combined for the pre-election and post-election surveys. The study design envisages conducting both sub-studies, the pre-and post-election survey, in the same sample points. Before the sample of persons is drawn, the addresses received from the municipalities are randomly distributed for use in one of the two studies.

4. Data Collection

4.1 Data Collector

Kantar Public Germany

4.2 Mode of Data Collection

Cross-sectional survey in mixed-mode design: online interviews (CAWI) and paper-and-pencil interviews (PAPI), interview invitations by mail and two postal reminders.

Invitations for both modes were sent in three staggered batches. The first set were contacted on 2021-08-26, the second on 2021-09-02 and the third on 2021-09-09. Up to two postal reminders followed if no participation was recorded by the time the reminders were sent.

There was a prepaid incentive of 5 euros. For all three installments, a postpaid incentive of 10 euros was additionally included in the second reminder letter due to the proximity of the election date.

Respondents were not assigned to a particular mode in advance. Instead, both modes were generally available to all respondents. In order to direct as many respondents as possible to the CAWI mode, a push-to-web design with online link was used for respondents 69 years old or younger with the invitation and the first reminder. The paper questionnaire was sent along only with the second reminder for the first and second batches and with the first reminder for the third batch due to the proximity in time to the federal election. For those over 70, the same push-to-web design was followed, but a paper questionnaire was sent along with the first invitation. For the first and second installments, a paper questionnaire was sent again with the second reminder, and for the third installment it was sent with the first reminder.

4.3 Interview Duration

The CAWI version had a mean duration of 76.08 minutes (arithmetic mean) and 55.63 minutes (median). The PAPI version had a mean duration of 108.8 minutes (arithmetic mean) and 80 minutes (median).

5. Data Processing and Enrichment

5.1 Preliminary Note

The processing of the data follows the directive of minimal invasive editing. It was done based on syntax files. It is therefore possible to reproduce all steps.

5.2 Data Checks and Editing

All data are carefully checked after data collection has been finished. This includes checking whether all of the variables are included in the dataset, the correctness of variable names and labels, the completeness of value labels, the coding of missing values, and the marginal distributions. These data checks are supplemented by the use of the freely available Stata module scandata (Kaukal 2016), which examines the variables in a dataset on the basis of given specifications regarding the use of capital letters or mutated vowels, length of variable names and labels, or odd distributions. It indicates deviations from these specifications and - if requested by the user - automatically corrects them. In addition, a technical check of the question routing is carried out as well as plausibility checks.

All errors found during these checks are documented and corrected (see 6.1 Errata of the Dataset). If errors occurred which could not be corrected, the error code -92 "error in data" applies.

Despite a thorough examination of the data, errors in the data records might remain undetected. If these are discovered at a later point in time, they are documented in the list of errata in the GESIS search (https://search.gesis.org/research_data/ZA7700) and corrected as soon as possible.

5.3 Coding

The coding of the variables follows the characteristics given in the questionnaire. If information is summarized or not published for data protection reasons, this is indicated in *Table 5 "Overview of data protection-sensitive variables"*.

If errors in the data could not be corrected at this stage of data processing, the scales were recoded to "-92 error in data" or - if the entire sample was affected - the variables were not published.

In the full release (dataset version v3.0.0), coded data were included in the dataset in addition to individual open-ended information. These include, first, variables q60a1-f1 on the question "Constituency Candidates: Familiarity", which were coded according to the coding in previous GLES cross-sectional studies. The other is the ISCO coding of occupational information according to ISCO88 and ISCO08.

Open-ended coding for the (second) most important problem is expected to be published in the fall of 2023.

5.4 PAPI Data

The preparation of the PAPI data is based in all respects on the structure of the CAWI survey. Questions that were asked differently in PAPI due to the mode (e.g., the question about voting decisions)

are - as far as possible - modeled on the CAWI target variables at the variable level. The filtering from CAWI was also replicated so that the dataset generally follows the same filtering despite differences in the survey. If respondents selected more than one response option for single-answer questions, their answer was (for the time being) coded as "-73 multiple answers".

The following questions or question items were not included in PAPI and were therefore set to missing ("-91 mode") for the entire PAPI sample:

- Corona: Infection, no (Question Number: Vw609, Variable q45a): Response option "no" is missing in PAPI. Individuals who made "-99 No answer" on question items q45b-d either refused to answer or did not indicate a Corona infection.
- Questions about state elections (Question Numbers: Vw617 to Vw623): Questions were not asked in PAPI mode.

Since no technical time measurement could be performed in the PAPI mode, the PAPI questionnaire contains additional questions on time measurement that are not included in CAWI:

- Interview: Start, PAPI (intstart_p)
- Interview: Duration, complete, PAPI (intdur_p)
- Interview: Interruption (int5)
- Interview: End, PAPI (intend_p)

5.5 Regional Units

With the release of the dataset, users are additionally provided with some regional units that are not included in the questionnaire but relate to the place of respondents' residence. This includes the allocation to constituencies for the 2021 federal election (constituency number and name) (*wknr*), the federal state (*bula*) and the allocation to Eastern and Western Germany (*ostwest*, *ostwest2*).

5.6 Published Interviews

The following interviews are published for this release:

- 1) Verified target person
Target persons were verified by comparing the self-declared year of birth and gender with the information from the registration office. Only persons whose year of birth does not deviate from the information from the registration office (tolerance +/- 1 year) are published.
- 2) Interview completed before the federal election
Questionnaires from the PAPI survey were accepted and scanned even after 2021-09-25. All interviews where respondents indicated that they completed the interview after 2021-09-25 were removed from the sample subsequently.
- 3) Most completed interview in case of multiple participations
In the case of multiple participations of a person (after verification of the target person), the interview that contains more complete information (terminated later/fewer "no answer") is published.
- 4) Complete and partial interviews
Based on the recommendations of AAPOR (2016), interviews are classified as complete if more than 80 percent of all applicable questions are answered. Interviews in which between 50 and 80 percent of all applicable questions are answered are classified as partial

interviews. Interviews in which less than 50 percent of the questions were answered are not published.

5.7 Variables in the Dataset

The GLES Pre-Election Cross-Section 2021 dataset includes different types of variables. These comprise metadata, paradata, and substantial data, as well as contextual and weighting variables (see also sections 5.7.1 to 5.7.6. *Table 2* provides an overview of the total number of variables in the dataset by variable type.

Table 2: Detailed Overview of the Number of Variables in the Dataset

Variable Type	Number
Metadata	6
Paradata	23
Contextual Variables	4
Weights	12
Substantial Data	435
Response Time Variables (additional dataset)	537
Total	1.017

5.7.1 Metadata

Metadata describe the dataset and its generation (Callegaro 2013) and include variables that are required for the archiving and distribution of the study (see *Table 3*).

Table 3: Metadata

Variable	Explanation
study	Provides the (ZA) study number of the dataset in four-digit format and the study number and title as value label
version	Dataset version, starting with 1.0.0
doi	Digital Object Identifier
field_start	First day of data collection
field_end	Last day of data collection
sample	Name of the sample

5.7.2 Paradata

Paradata are recorded as a by-product of the interview process. They include, for example, time and date of data collection and interview duration (Callegaro 2013). Administrative information such as identification numbers, information on the participation status of respondents, and information on their assignment to groups based on content information or random-based procedures are also treated as paradata here. *Table 4* provides an overview of paradata in the dataset.

If there is specific interest in additional paradata, their availability can be requested from the GLES team (gles@gesis.org).

Table 4: Paradata

Variable	Explanation
lfdn	A unique sequential identification number for the participants in the survey.
mode	Indicates whether respondents participated in CAWI or PAPI mode.
vpoint	Virtual Samplepoint
veri_flag	Indicates whether respondents show a deviation in the indication of gender.
intyear	Year of Interview
intmon	Month of Interview
intday	Day of Interview
intdate	Interview start date
intstart_c	Time of interview start, CAWI
intstart_p	Start time of interview, PAPI
intend_c	End time of interview, CAWI
intend_p	End time of interview, PAPI
intdur_c	Duration of whole interview session, CAWI
intdur_p	Duration of whole interview session, PAPI
intdate_flag	Indicates whether the start and end of the interview are on the same day.
intdur_cont	Duration of the interview of all substantial questions, CAWI
intdur_socio	Duration of the interview of all sociodemographic questions, CAWI
intdur_panel	Duration of the interview of questions to Willingness to Participate in the Panel, CAWI
intstatus	Share of completed interview questions (1 = complete (over 80 percent answered), 2 = partial (more than 50 and up to 80 percent answered), 3 = incomplete (50 percent or less answered))
intstatus_prc	see above, in percent
d5_flag	Indicates cases with implausible data on marital status in combination with age.
d8j_flag	Indicates cases with implausible data on higher education in combination with age
d17a_flag	Indicates cases with implausible data on periods of unemployment in combination with age.
d45_flag	Indicates cases with implausible data on the year of immigration in combination with age.

5.7.3 Contextual Variables

Contextual variables provide information about the regional context of respondents, e.g., the constituency and municipality in which respondents live.

Federal state

The variable *bula* indicates the federal state in which the respondents reside and is based on the information on postal code and place of residence.

East/West

The allocation to eastern and western Germany was made on the basis of information on the federal state in which the respondents reside. For the variable *ostwest*, all respondents living in Berlin are counted as East Germans. For the variable *ostwest2*, a differentiated assignment of Berlin residents to East or West Germany is made.

Assignment to Constituencies

The assignment to a constituency is based on the constituency division for the 2021 federal election and was made using the addresses. In municipalities that belong to only one constituency, the assignment was made by program; in large cities with several constituencies, the assignment was made manually.

5.7.4 Weights

The pre-election cross-section contains two types of weights¹: a design weight and several adjustment weights.

The design weight (*w_ow*) corrects for oversampling of East Germany.

The second type of weights includes adjustment weights by socio-demographic and regional characteristics. Adjustment weights are calculated according to an iterative procedure ("iterative proportional fitting", IPF) (Deming/Stephan 1940). The basis for the adjustment weights are the distributions of gender (male, female), age (4 groups: 16-29, 30-44, 45-59 and 60 years and older), education (3 groups: low, medium, high), BIK regions (3 groups)² and East-West (for the weighting all Berliners were given East German weights)³. The weights will be adjusted to the marginal distributions of the Microcensus 2021.

All weights are generated on the basis of the complete and partial interviews. The age of the respondents is taken from the data provided by the registration office. Missing values were set to the modal value of the distribution for the creation of the weighting variables.

Due to the mixed-mode design, the weights are available separately for the PAPI and CAWI samples as well as for the entire sample.

¹ Detailed information on the selection and summary of the variables can be found in the Technical Report 2013|19 as well as in the GESIS Papers 2016|01 (Blumenberg et al. 2013; Blumenberg et al. 2016).

² The BIK region size classes classify the BIK region by their population size. Hereby, not the size of the municipality itself is reported but the size of the population in the area, in which the municipality is functionally integrated (see BIK-Institut Aschpurwis/Behrens (2001) for further information).

³ The adjustment weights were computed with the statistical software Stata using the Ado „ipweight“ by Michael Bergmann (2011). The described procedure is also applied in calculating the weights of the ANES (see DeBell et al. (2009)).

5.7.5 Substantial Data

Substantial data form the main component of the dataset. They include respondents' answers to the questions posed about attitudes, behavior and sociodemographics. The CAWI survey comprised 177 questions, the PAPI survey comprised 147 questions. The variables included in the dataset can be seen in the headers of the individual questions below.

5.7.6 Response Time Variables

The time measurement was screen-based within the CAWI survey. In addition to the information on the total survey time in the main dataset, the separate time variable dataset contains time stamps for each page viewed as well as information on the duration of the respondents for each question and the cumulative duration. The dataset provided contains three types of time variables: The first set of time variables identifies the time at which respondents left each page (example: "t15" for the time when the response to question q13 is completed). The second group of time variables indicates the response time in seconds screen-based. These variables are suffixed with "_d" in the variable name (example: "t15_d" for the time taken to answer question q13). The third group of time variables contains the cumulative time of a respondent that was needed to get to the respective point of the survey. These are marked in the variable name with the suffix "_dc" (example: "t15_dc" for the time taken to answer the questionnaire up to and including question q13). The last two types of time variables indicate the duration in seconds.

5.8 Sensitive Variables

Some of the variables cannot be made available as a direct download due to data protection regulations. As a rule, a data use contract must be concluded for these data before they are made available (off-site use). In exceptional cases, data access is restricted to on-site use. Further details can be found [here](#). An overview of the data for restricted use and the access possibilities to this data can be found in the following *Table 5*. Data use is free of charge in both cases.

The data usage contract for off-site use is available in [English](#) and [German](#). To gain access to the data, data recipients must fill in the data use contract properly and forward it to the [GLES team](#). If you are interested in on-site use, please also contact the GLES team.

Table 5: Overview of data protection-sensitive variables

Variable Name	Variable Label	Data Protection Adjustment	Availability of Variable in SUF	Access to Original Variable
d1	Gender	Category " <i>diverse</i> " is randomly assigned to categories " <i>male</i> " and " <i>female</i> ".	recoded	Data Use Agreement
d2a	Date of birth: year	Extreme values (year of birth: „1931 and earlier“) were combined.	recoded	Data Use Agreement
d2b	Date of birth: month	The month of birth is not published in SUF.	not available	Data Use Agreement
d2c	Date of birth: day	The birthday is not published.	not available	no access
q19s	Political problems: most important, open	Variables were only published after data protection checks of the open data and sensitive information was removed. Coding of the open data will take place in 2023.	after data protection audit	no access without data protection audit
q21s	Political problem: second most important, open			
d3	Household: size	The values 6 " <i>6 people</i> " 7 " <i>7 people</i> " 8 " <i>8 people and more</i> " were combined in category 6 " <i>6 people and more</i> ".	recoded	Data Use Agreement
d4f	Household: Age, 7th. Person	The variables on the age of the 7th and 8th person in the household were not published.	not available	Data Use Agreement
d4g	Household: Age, 8th. Person			
d7s	Education: School, other Certificate, open	Variables are only made available for off-site use after data protection checks of the open data. The coding of the open data on occupation according to the ISCO88 and ISCO08 scheme is published with the full release.	not available	Data Use Agreement after data protection audit
d12s	Occupation: current, open			
d21s	Occupation: current, open			

d25s	Education: School, Partner, other certificate, open			
d29s	Occupation: current, Partner, open			
d34s	Occupation: former, Partner, open			
d44s	Country of Birth: other Country	Open data provided under 16 " <i>other country, namely:</i> " was not published in SUF. However, they are made available for off-site use after a data protection check.	not available	Data Use Agreement after data protection audit
d50s	Country of Birth: other Country, Father			
d51s	Country of Birth: other Country, Mother			
d53s	Country of Birth: other Country, Partner			
d58	Household: Language, other	Information provided on another language spoken in the household will only be made available for off-site use after data protection audit of the open information.	not available	Data Use Agreement after data protection audit
d58s	Household: Language, other, open			
d61*	Membership: Organisation	<p>The values</p> <p>1 "<i>I am a member and execute an office or function</i>"</p> <p>2 "<i>yes, I am a member, I do not execute an office, but I actively participate</i>"</p> <p>3 "<i>yes, I am a passive member</i>"</p> <p>were combined into 1 "<i>yes, I am a member</i>".</p> <p>For off-site use, a recoding into</p> <p>1 "<i>yes, I am an active member</i>" and</p> <p>3 "<i>yes, I am a passive member</i>" can be requested.</p> <p>The use of the original variable is only possible on-site.</p>	recoded	on-site
wum7s	Residential Environment: Buildings, open	Open data provided under 8 " <i>other house/building, namely:</i> " or " <i>other form of housing, namely:</i> " are only made available for off-site use after a data protection check of the open data.	not available	Data Use Agreement after data protection audit
wum8s	Residential Environment: Housing Conditions, open			
wb1	Willingness to Participate in Panel	Variables are only collected for internal purposes.	not available	no access

wb2	Willingness to Participate in Panel : E-Mail adress			
bik10	BIK Region	Information on the BIK region can be used off-site in recoded form with 8 values (summary of categories 1 to 3). All expressions in unrecoded form are only available on-site.	not available	on-site
vpoint	Virtual Sample Point	Instead of the original sample point, a virtual sample point is used, i.e. a number is randomly assigned to each sample point so that the clusters can be reproduced.	recoded	on-site
Regional data	Postal Code, District Code, General Municipality Code, etc.	Information on the respondents' federal state, East/West affiliation and electoral district are part of the SUF. Small-scale regional data on place of residence can only be used on-site and is published separately (see ZA6828 GLES Sensitive Regional Data).	Federal State, East/West, Electoral District available	small-scale regional data only on-site

6. Notes and Comments on the Dataset

6.1 Errata of the Dataset

- N.n.

6.2 Version History of the Dataset

Changes between version 3.0.0 (Full Release) and version 3.1.0 (Full Release):

- Update of weighting variables and adjustment to the 2021 microcensus.

Changes between version 2.0.0 (Pre-Release 2) and version 3.0.0 (Full Release):

- Correction of filter testing and reconstruction in the PAPI sample.
- Filter testing of open data.
- Additional dataset with time variables for the CAWI sample published. These are technically generated time stamps as well as calculated duration times per variable and cumulatively.
- Adjustments of variable and value labels.
- Coded variables for question "Constituency candidates: Familiarity" (q60a1-f1) included in main dataset.
- Variables for the questions „Constituency Candidates: Election Campaign“ (q61a-f) and „Constituency Candidates: Valuation“ (q62a-f) included in main dataset.
- Coded variables on occupational information („Occupation: current“, „Occupation: former“, „Occupation: current, Partner“, „Occupation: former, Partner“) according to the ISCO coding scheme ISCO88 and ISCO08, as well as variables with problematic cases in the coding, included in the main dataset.
- Plausibility testing and flag variables added to the dataset to indicate implausible information (d5_flag, d8j_flag und d17a_flag).
- English language versions of the datasets

Changes between Version 1.0.0 (Pre-Release) and Version 2.0.0 (Pre-Release 2):

- Due to a coding error, the same numerical value was assigned to different sample points in three cases when creating the "Virtual Sample Point" (vpoint). This error has been fixed.
- Adjustments of variable and value labels.
- The following variable names corresponding to the questions on vocational education have been wrongly named in the PAPI dataset and have now been corrected: "Education: Occupation, other vocational training qualification" (d8k), "Education: Occupation, still in vocational training" (d8l), "Education: Occupation, no completed vocational training" (d8m).
- Data on unemployment in the past 10 years (variables d17*) were checked for plausibility and were then corrected.
- 104 cases were removed from the dataset due to incomplete responses after recalculation of the interview status variable.

7. Overview of Questions

7.1 CAWI order

Table 6: Question overview CAWI order

Se- quence	Question Number	Variable Label	Question Title
1,000	Int01	d1	Gender
2,000	D01.1	d2a-c	Date of Birth: Year, Month, Day
3,000	Vw087	q1	Political Interest
4,000	Vw088	q2	Election Campaign: Interest
5,000	Vw089	q3	Election Campaign: Outcome, Importance
6,000	Vw155	q4	Democracy: Satisfaction
7,000	Vw112	q5	Political Knowledge: First/Second Vote
8,000	Vw001	q6	Vote Participation: Vote Intention, FE 2021
9,000	Vw161	q7	Vote Participation: hypothetical under 18, FE 2021
10,000	Vw002	q8a-b	Vote Intention: FE 2021
11,000	Vw162	q9a-b	Vote Intention: hypothetical under 18, FE 2021
12,000	Vw234	q10a-b	Voting Decision: Absentee Ballot, FE 2021
13,000	Vw008	q11	Vote Intention: Certainty, FE 2021
14,000	Vw624	q12a-c	Attitudes: Elections' Integrity
15,000	Vw030	q13	Economic Situation: current, personal
16,000	Vw029	q14	Economic Situation: retrospective, personal
17,000	Vw014	q15	Economic Situation: Responsibility, personal
18,000	Vw031	q16	Economic Situation: prospective, personal
19,000	Vw351	q17b-h	Political Parties: Scalometer
20,000	Vw352	q18a-h	Leading Politicians: Scalometer
21,000	Vw353	q19	Political Problems: most important
22,000	Vw361	q20	Political Problems: most important, Ability to Solve
23,000	Vw354	q21	Political Problems: second most important
24,000	Vw362	q22	Political Problems: second most important, Ability to Solve
25,000	Vw034	q23	Economic Situation: current, general
26,000	Vw032	q24	Economic Situation: retrospective, general
27,000	Vw033	q25	Economic Situation: Responsibility, general
28,000	Vw035	q26	Economic Situation: prospective, general
29,000	Vw256	q27a-j	Attitudes: Issue Battery
30,000	Vw601	q28	Candidate for Chancellor: Preference
31,000	Vw599	q29a-b	Candidate for Chancellor: Attribute, CDU/CSU
32,000	Vw600	q30a-b	Candidate for Chancellor: Attribute, SPD
33,000	Vw602	q31a-b	Candidate for Chancellor: Attribute, GRÜNE
34,000	Vw597	q32	Right to Vote: Recall, FE 2017
35,000	Vw603	q33	Vote Participation: Recall, FE 2017
36,000	Vw005	q34a-b	Voting Decision: Recall, FE 2017
37,000	Vw038	q35b-h	Political Parties: Left-Right Assessment
38,000	Vw360	q36a-c	Leading Politicians: Left-Right Assessment
39,000	Vw040	q37	Left-Right Assessment: Ego
40,000	Vw400	q38a-f	Psychological Concepts: Emotions, Fear
41,000	Vw370	q39b-h	Position Issue: Taxes vs. Social Services
42,000	Vw042	q40	Position Issue: Taxes vs. Social Services, Ego
43,000	Vw045	q41	Position Issue: Taxes vs. Social Services, Salience
44,000	Vw371	q42b-h	Position Issue: Immigration
45,000	Vw044	q43	Position Issue: Immigration, Ego
46,000	Vw047	q44	Position Issue: Immigration, Salience
47,000	Vw609	q45a-d	Corona: Infection
48,000	Vw610	q46a-d	Left behind: subjective

49,000	Vw372	q47b-h	Position Issue: Climate Change
50,000	Vw258	q48	Position Issue: Climate Change, Ego
51,000	Vw259	q49	Position Issue: Climate Change, Salience
52,000	Vw117	q50a-f	Attitudes: Politics in General
53,000	Vw401	q51a-f	Attitudes: Populism
54,000	Vw290	q52	Federal Government: Performance
55,000	Vw012	q53b-d	Governing Parties: Performance
56,000	Vw260	q54e-h	Opposition Parties: Performance
57,000	Vw611	q55	Chancellor: Performance
58,000	Vw626	q56a-e	Federal Government: Work, specific
59,000	Vw261	q57a-i	Coalitions: Scalometer
60,000	Vw404	q58a-x	Coalition Partner: Expectations
61,000	Vw051	q59	Constituency Candidates: Winner
62,000	Vw021	q60a1-f1	Constituency Candidates: Familiarity
63,000	Vw280	q61a-h	Constituency Candidates: Election Campaign
64,000	Vw300	q62a-h	Constituency Candidates: Valuation
65,000	Vw119	q63a-e	Representation Norm
66,000	Vw053	q64	Media Use for pol. Information: most important Source of Information
67,000	Vw407	q65	TV News Programmes: Use, Frequency, public-service Broadcaster
68,000	Vw408	q66	TV News Programmes: Use, Frequency, commercial Broadcaster
69,000	Vw409	q67a-i	Print: Use, Frequency
70,000	Vw305	q68	Internet: Use, on Average
71,000	Vw306	q69	Internet: Use, News, Frequency
72,000	Vw410	q70a-x	Social Media: Use
73,000	Vw411	q71a-x	Social Media: Use, political
74,000	Vw402	q72a-h	Political Participation: online
75,000	Vw116	q73a-h	Political Participation: offline
76,000	Vw195	q74	Political Participation: Political Party
77,000	Vw121	q75	Party Identification
78,000	Vw122	q76	Party Identification: Strength
79,000	Vw123	q77	Party Identification: Persistence
80,000	Vw118	q78	Psychological Concepts: Trust, general
81,000	Vw627	q79a-i	Trust: Institutions
82,000	Vw153	q80a-j	Psychological Concepts: Big five
83,000	Vw616	q81	Vote Participation: Vote Intention, SE MV 2021
84,000	Vw620	q82	Vote Participation: Vote Intention, SE BE 2021
85,000	Vw617	q83	Vote Participation: hypothetical under 18, SE MV 2021
86,000	Vw621	q84	Vote Participation: hypothetical under 18, SE BE 2021
87,000	Vw618	q85a-b	Vote Intention: SE MV 2021
88,000	Vw622	q86a-b	Vote Intention: SE BE 2021
89,000	Vw619	q87a-b	Vote Intention: hypothetical under 18, SE MV 2021
90,000	Vw623	q88a-b	Vote Intention: hypothetical under 18, SE BE 2021
91,000	Vw075	q89	Personal Networks: Frequency Discussions about Politics
92,000	Vw292	q90	Personal Networks: Network Size
93,000	Vw293	q91	Personal Networks: Person 1, Relationship (A)
94,000	Vw294	q92	Personal Networks: Person 1, Relationship (B)
95,000	Vw079	q93	Personal Networks: Person 1, Differences of Opinion
96,000	Vw277	q94	Personal Networks: Person 1, Vote Intention
97,000	Vw296	q95	Personal Networks: Person 2, Relationship (A)
98,000	Vw297	q96	Personal Networks: Person 2, Relationship (B)
99,000	Vw279	q97	Personal Networks: Person 2, Differences of Opinion
100,000	Vw086	q98	Personal Networks: Person 2, Vote Intention
101,000	Vw286	q99	Vote Participation: Neighbourhood, FE 2021
102,000	Vw270	q100	Justice: Society
103,000	Vw271	q101	Justice: Development
104,000	Vw272	q102	Justice: Ego
105,000	Vw124	q103	Party Identification: Father
106,000	Vw125	q104	Party Identification: Mother
107,000	T01.1	d3	Household: Size

108,000	D01.3	d4a-g	Household: Age
109,000	T04.1	d5	Marital Status
110,000	T04.2	d6	Partner
111,000	T05.1	d7	Education: School
112,000	T05.4	d8a-m	Education: Profession
113,000	T06.6	d9	Gainful Employment: current
114,000	D06.7	d10	Gainful Employment: former
115,000	T07.1	d11	Profession: current
116,000	D07.2	d12	Occupation: current
117,000	T09.1	d13	Profession: current, Employment Contract
118,000	T07.4	d14	Profession: current, Supervisory Function
119,000	T07.6	d15	Profession: current, Employment Sector
120,000	T07.7	d16	Profession: current, Business Sector
121,000	T06.9	d17	Unemployment: over last 10 Years
122,000	T09.4	d18	Job Loss: Fear
123,000	T09.7	d19	Loss of Professional Career: Fear
124,000	T08.1	d20	Profession: former
125,000	T08.2	d21	Occupation: former
126,000	T08.4	d22	Profession: former, Supervisory Function
127,000	T08.6	d23	Profession: former, Employment Sector
128,000	T08.7	d24	Profession: former, Business Sector
129,000	T10.01	d25	Education: School, Partner
130,000	T10.6	d26	Gainful Employment: current, Partner
131,000	T10.7	d27	Gainful Employment: former, Partner
132,000	T11.1	d28	Profession: current, Partner
133,000	T11.2	d29	Occupation: current, Partner
134,000	T11.4	d30	Profession: current, Supervisory Function, Partner
135,000	T11.6	d31	Profession: current, Employment Sector, Partner
136,000	T11.7	d32	Profession: current, Business Sector, Partner
137,000	T12.1	d33	Profession: former, Partner
138,000	T12.2	d34	Occupation: former, Partner
139,000	T12.4	d35	Profession: former, Supervisory Function, Partner
140,000	T12.6	d36	Profession: former, Employment Sector, Partner
141,000	T12.7	d37	Profession: former, Business Sector, Partner
142,000	T16.1	d38	Class Affiliation: subjective, personal
143,000	T17.1	d39	Religious Denomination
144,000	T17.2	d40	Divine Service: Frequency
145,000	T17.3	d41	Religious Views
146,000	T02.1	d42	Citizenship: German, since Birth
147,000	T18.1	d43	Country of Birth: Germany
148,000	T18.11	d44	Country of Birth: other country
149,000	T18.2	d45	Immigration: Year
150,000	T18.12	d46	Country of Birth: Federal State
151,000	T18.22	d47	Immigration: Year, East Germany
152,000	T18.21	d48	Immigration: Year, West Germany
153,000	T23.1	d49	Country of Birth: Germany, Parents
154,000	T23.2	d50	Country of Birth: other Country, Father
155,000	T23.3	d51	Country of Birth: other Country, Mother
156,000	T18.3	d52	Country of Birth: Germany, Partner
157,000	T18.31	d53	Country of Birth: other Country, Partner
158,000	T23.11	d54	Country of Birth: Germany, Grandparents
159,000	T23.7	d55	Immigration: Year, Father
160,000	T23.6	d56	Immigration: Year, Mother
161,000	T23.4	d57	Household: Language, German
162,000	T23.5	d58	Household: Language, other
163,000	T23.8	d59	Origin: Displaced People ("Ausgesiedelte")
164,000	T23.9	d60	Origin: Asylum Seekers
165,000	T19.2	d61a-i	Membership: Organisation
166,000	T20.1	d62	Membership: Trade Union, HH

167,000	T15.1	d63	Household Net Income
168,000	wum6	wum6	Residence: urban-rural
169,000	wum7	wum7	Residential Environment: Buildings
170,000	wum8	wum8	Residential Environment: Housing Conditions
171,000	wum9	wum9	Residential Environment: Class
172,000	int1	int1	Interview: Rating of Survey
173,000	int3	int3a-e	Interview: Presence of Others
174,000	int4	int4	Interview: Coordination with Others
175,000	int2	int2s	Interview: Comment, open
176,000	wb1	wb1	Willingness to Participate in Panel
177,000	wb2	wb2	Willingness to Participate in Panel: E-mail address

7.2 PAPI Order

Table 7: Question overview PAPI order

Se- quence	Question Number	Variablen- name	Question Title
0	int6	intstart_p	Interview: Start, PAPI
1	Vw087	q1	Political Interest
2	Vw088	q2	Election Campaign: Interest
3	Vw089	q3	Election Campaign: Outcome, Importance
4	Vw155	q4	Democracy: Satisfaction
5	Vw112	q5	Political Knowledge: First/Second Vote
6	Vw001	q6	Vote Participation: Vote Intention, FE 2021
7	Vw161	q7	Vote Participation: hypothetical under 18, FE 2021
8	Vw002	q8a-b	Vote Intention: FE 2021
8	Vw162	q9a-b	Vote Intention: hypothetical under 18, FE 2021
8	Vw234	q10a-b	Voting Decision: Absentee Ballot, FE 2021
9	Vw008	q11	Vote Intention: Certainty, FE 2021
10	Vw624	q12a-c	Attitudes: Elections' Integrity
11	Vw030	q13	Economic Situation: current, personal
12	Vw029	q14	Economic Situation: retrospective, personal
13	Vw014	q15	Economic Situation: Responsibility, personal
14	Vw031	q16	Economic Situation: prospective, personal
15	Vw351	q17b-h	Political Parties: Scalometer
16	Vw352	q18a-h	Leading Politicians: Scalometer
17	Vw353	q19	Political Problems: most important
18	Vw361	q20	Political Problems: most important, Ability to Solve
19	Vw354	q21	Political Problems: second most important
20	Vw362	q22	Political Problems: second most important, Ability to Solve
21	Vw034	q23	Economic Situation: current, general
22	Vw032	q24	Economic Situation: retrospective, general
23	Vw033	q25	Economic Situation: Responsibility, general
24	Vw035	q26	Economic Situation: prospective, general
25	Vw256	q27a-j	Attitudes: Issue Battery
26	Vw601	q28	Candidate for Chancellor: Preference
27	Vw599	q29a-b	Candidate for Chancellor: Attribute, CDU/CSU
28	Vw600	q30a-b	Candidate for Chancellor: Attribute, SPD
29	Vw602	q31a-b	Candidate for Chancellor: Attribute, GRÜNE
30	Vw597	q32	Right to Vote: Recall, FE 2017
31	Vw603	q33	Vote Participation: Recall, FE 2017
32	Vw005	q34a-b	Voting Decision: Recall, FE 2017
33	Vw038	q35b-h	Political Parties: Left-Right Assessment
34	Vw360	q36a-c	Leading Politicians: Left-Right Assessment
35	Vw040	q37	Left-Right Assessment: Ego
36	Vw400	q38a-f	Psychological Concepts: Emotions, Fear
37	Vw370	q39b-h	Position Issue: Taxes vs. Social Services
38	Vw042	q40	Position Issue: Taxes vs. Social Services, Ego
39	Vw045	q41	Position Issue: Taxes vs. Social Services, Salience
40	Vw371	q42b-h	Position Issue: Immigration
41	Vw044	q43	Position Issue: Immigration, Ego
42	Vw047	q44	Position Issue: Immigration, Salience
43	Vw609	q45a-d	Corona: Infection
44	Vw610	q46a-d	Left behind: subjective
45	Vw372	q47b-h	Position Issue: Climate Change
46	Vw258	q48	Position Issue: Climate Change, Ego
47	Vw259	q49	Position Issue: Climate Change, Salience
48	Vw117	q50a-f	Attitudes: Politics in General
49	Vw401	q51a-f	Attitudes: Populism
50	Vw290	q52	Federal Government: Performance

51	Vw012	q53b-d	Governing Parties: Performance
52	Vw260	q54e-h	Opposition Parties: Performance
53	Vw611	q55	Chancellor: Performance
54	Vw626	q56a-e	Federal Government: Work, specific
55	Vw261	q57a-i	Coalitions: Scalometer
56	Vw404	q58a-x	Coalition Partner: Expectations
57	Vw051	q59	Constituency Candidates: Winner
58	Vw021	q60a1-f1	Constituency Candidates: Familiarity
59	Vw280	q61a-h	Constituency Candidates: Election Campaign
60	Vw300	q62a-h	Constituency Candidates: Valuation
61	Vw119	q63a-e	Representation Norm
62	Vw053	q64	Media Use for pol. Information: most important Source of Information
63	Vw407	q65	TV News Programmes: Use, Frequency, public-service Broadcaster
64	Vw408	q66	TV News Programmes: Use, Frequency, commercial Broadcaster
65	Vw409	q67a-i	Print: Use, Frequency
66	Vw305	q68	Internet: Use, on Average
67	Vw306	q69	Internet: Use, News, Frequency

PAPI**Output filter:****Completion instructions:**

Please indicate all the social media platforms you use to inform yourself politically.

Question text:

And please name which social media platform you use occasionally or regularly to inform yourself about political news.

Items:

- A) WhatsApp
- (B) Facebook
- I Instagram
- (D) YouTube
- I Twitter
- (F) Snapchat
- (G) TikTok
- (H) Telegram
- (I) Signal
- (J) Threema
- (K) XING
- (L) LinkedIn
- (M) Discord
- (N) Other, namely _____

(X) I don't use any social media for political information.

Scale:
(1) Mentioned
(0) Not mentioned

(-97) Not applicable
(-99) No answer

Note:
In CAWI Mode, item N was programmed incorrectly. Instead of a field for open answers, the answer from q70ns (Social media: Use, other, which, open) was displayed. For CAWI respondents, the variable q71ns was therefore formed from a replicate of the variable q70ns.

(X) I don't use any social media for political information.

Scale:
(1) Mentioned
(0) Not mentioned

(-99) No answer

Note:
In PAPI Mode, as planned, there was an open field to indicate another social media platform. The open entries in q71ns from PAPI Mode are therefore respondents' original answers provided for this question.

Thank you for taking part in the survey.

To finish, we have a request for you: the German Election Study is not only interested in your current opinions on important social issues, but also in how they develop between federal elections. Therefore, we cordially invite you to participate in 20- to 30-minute follow-up surveys for the German Election Study, which you can answer easily and conveniently on your computer, laptop or smartphone via the Internet.

Your participation in further surveys is of course voluntary!

In order to be able to invite you to the follow-up surveys of the German Election Study, we would like to keep your contact data at GESIS - Leibniz Institute for the Social Sciences. Your contact data will be kept exclusively for this purpose. It will not be passed on to third parties and will be permanently deleted after completion of the study. GESIS keeps your contact data separate from the information you provided in the questionnaire. This way, your answers will never be associated with you personally. Your answers from these several surveys will be linked to each other only by a code number and will only be evaluated anonymously. You can withdraw your consent to participate in further surveys at any time and your contact data will then be deleted immediately.

Detailed information on data protection and your rights can be found in our privacy policy.

Do you agree to having your contact data stored at GESIS - Leibniz Institute for the Social Sciences?

Items:**Scale:**

(1) Yes, I agree.

(2) No, I do not agree

(-99) No answer**Note:****Completion instructions:****Question text:**

Thank you for taking part in our survey.

The German Election Study continues and your opinion will remain important in the future! Therefore, we have another request for you: We would be very pleased if we could invite you to the follow-up surveys of the German Election Study. The follow-up surveys will take 20 to 30 minutes and will be conducted up to twice a year by GESIS - Leibniz Institute for the Social Sciences. You can easily and conveniently participate in the surveys via the Internet on your computer, laptop or smartphone. To thank you for your willingness to support scientific research in Germany we will reward your participation with 5 euros.

Your participation in further surveys is of course voluntary!

May we invite you to the follow-up surveys of the German Election Study under the address we already have?

Items:**Scale:**

(1) Yes, I agree.

(2) No, I do not agree

(-99) No answer**Note:**

CAWI**Input filter:****Programming:**

Single selection one under another with an open text field. Plausibility check: e-mail address must contain "@" characters, and "@" must be followed by a "." at any distance. Ignorable plausibility text: "The e-mail address you entered is incorrect. Please check your entry. Ignorable DAC: "Your answer is very important to us. Please answer this question."

Completion instructions:**Question text:**

To make it as convenient as possible for you to participate in further surveys of the German Election Study, we would like to ask you for your e-mail address. For further surveys, in addition to a postal invitation you will also receive an e-mail notification with a link that will easily take you to the survey.

Please enter your e-mail address if you agree to it being stored at GESIS - Leibniz Institute for the Social Sciences in order to invite you to further surveys of the German Election Study.

[italics: If you have more than one e-mail address, please indicate the e-mail address under which we may invite you to the further surveys. Of course, your e-mail address will be stored separately from your survey information].

Items:**Scale:**

- (1) Yes, my email address is: <text field>.
- (2) No, I do not have an e-mail address.
- (3) No, I do not want to provide an email address.

(-99) No answer

Note:**PAPI****Output filter:****Completion instructions:****Question text:**

If you agree:

We would also like to contact you by e-mail. This has an advantage for you: In addition to a postal invitation, you will also receive an e-mail with a link that will easily take you to the follow-up survey of the German Election Study.

In any case:

At the time of data collection, your e-mail address is already recorded and stored separately from your other information in the questionnaire.

At GESIS - Leibniz Institute for the Social Sciences, your e-mail address and your other contact data will of course also be stored separately from the information you provided in the questionnaire in order to conduct the follow-up surveys.

Please enter an e-mail address under which we may invite you.

Items:**Scale:**

- (1) Yes, my email address is: <text field>.
- (2) No, I do not have an e-mail address.
- (3) No, I do not want to provide an email address.

Vw296	Personal Networks: Person 2, Relationship (A)	Were incorrectly listed under "Filter adapted" in the last version history

Changes between the version of the questionnaire v2.0 and its previous version (v1.0, 2021-11-25)

Table 10: Modification history of the questionnaire documentation from v1.0 to v2.0

Question Number	Question Title	Description
int4	Interview: Coordination with Others	Filter adapted
wb1	Willingness to Participate in Panel	Question text corrected
wb2	Willingness to Participate in Panel : E-Mail adress	Question text corrected and filter added
wb3	Willingness to Participate in Panel: Place of Birth, 1st Character	Question was not asked and thus deleted from documentation

Changes between the version of the questionnaire v1.0 and its previous version (Pre-release v0.2, 2021-08-26)

In contrast to the pre-release of the questionnaire v0.2, the questionnaire documentation provided here does not only contain the CAWI mode but offers a comparison of the CAWI mode and the PAPI mode. Mode-related differences thus become traceable. If there are significant differences in the query, this is indicated in the Note of the respective question.

Table 11: Modification history of the questionnaire documentation from v0.2 to v1.0

Question Number	Question Title	Description
Vw001	Vote Participation: Vote Intention, FE 2021	
Vw616	Vote Participation: Vote Intention, SE MV 2021	Filter adapted
